

DR. ANN ZEDLITZ

Z AESTHETIC DERMATOLOGY
BATON ROUGE, LOUISIANA

American Board of Dermatology

WHAT IS MOST IMPORTANT TO YOU WHEN DOING PATIENT TREATMENTS?

Comfort. When I perform a procedure on a patient, I want them to feel relaxed. This relaxation starts with educating the patient on the procedure so that they know what to expect. They are comforted by my well-trained staff and my board certification in dermatology. My emergency medicine background helps me keep the patient relaxed and pain-free before, during and after the procedure.

WHAT MAKES YOUR PRACTICE SPECIAL?

I stay up-to-date on dermatology, always traveling and taking classes to know what's new and innovative. I am a member of the American Society for Laser Medicine and Surgery. I also bring a woman's perspective to my work; for example, I think about the fact that we want perky ears for our earrings, so I've been offering earlobe laser rejuvenation automatically with my face laser CO₂. Women notice and appreciate things like that.

HOW DO YOU RELATE TO YOUR PATIENTS?

I have tried every procedure that I offer so that I know what they are going through. If it's not effective or something that I would give myself or a family member, then I do not use it in my practice.

LASER-EDGED CARE

One of the most impressive breakthroughs in the world of skin care has been highly effective lasers that can resurface, rejuvenate and refresh. Dr. Zedlitz has a vast array of lasers for her patients, from the popular CO₂ fractional laser to hair-removal devices. "We offer fractionated and complete CO₂ resurfacing to diminish wrinkles, spots and sun damage along the face and chest areas," says Dr. Zedlitz. "Our thorough pre-op consultations help us to analyze the skin and how it may react to treatments. We use digital photography to track patients' progress so they can see the difference, and we love watching them get excited about their results."

BEFORE

CASE 1

AFTER

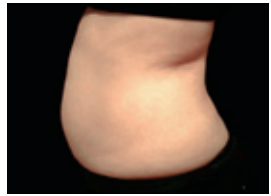

➤ LASER RESURFACING TREATMENT

Dr. Zedlitz performed a CO₂ laser skin resurfacing treatment on this 74-year-old patient to combat her concerns of saggy, droopy eyelid skin that worsened with age.

BEFORE

CASE 2

AFTER

➤ A NATURAL RESULT WITH COOLSCULPTING

Concerned about stubborn fat, this 28-year-old patient visited Dr. Zedlitz for a CoolSculpting treatment, which helped her achieve her weight-loss goal before her wedding.

FROM ARRANGING YOUR TRAVEL AND HOTEL ACCOMMODATIONS, TO PROVIDING PRIVATE NURSING SERVICES DURING YOUR RECOVERY, Z AESTHETIC DERMATOLOGY PROVIDES THE ULTIMATE DESTINATION DERMATOLOGY EXPERIENCE.

WHY DID YOU CHOOSE TO BECOME A DERMATOLOGIST?

I love helping people feel more confident about themselves! In dermatology, there are so many modalities that give me the ability to help patients achieve their healthy skin goals. If you wake up and don't like what you see in the mirror, that can set the tone for the day and maybe even the rest of your life. If I can change the reflection so that you like what you see, then I can help you feel empowered in your careers, relationships and friendships.

ARE YOU INVOLVED IN ANY PRO BONO PROJECTS?

I give away a basket every month to a teacher, filled with beauty products, or treat them to a chemical peel or facial because the job that they do is so very important, and I want them to feel appreciated. I also do volunteer teaching at Louisiana State University.

WHAT NEW PROJECTS ARE YOU EXCITED ABOUT?

I recently launched a new skin-care line that I want everyone to know about. For more information and updates on Zmd Skin Care Solutions, join the Zmd Community on Facebook, Twitter and YouTube.
