

Mother Nature, lifestyle or gravity. No matter the culprit, many of us have bulges of stubborn fat.

Those unwanted bulges contain fat cells which can be resistant to diet and exercise, but not to CoolSculpting.

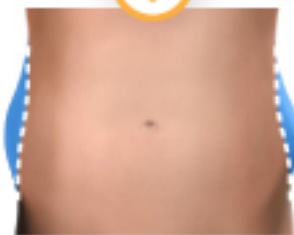

CoolSculpting uses controlled cooling to target and crystallize fat cells.

Crystallized fat cells gradually die off, then are naturally eliminated from your body.

In the weeks and months following treatment, remaining fat cells condense, reducing the fat layer.

CoolSculpting lets you say goodbye to stubborn fat.
